EDUCATION

Emory University

Bachelor of Science in Computer Science, GPA: 3.98

Atlanta, GA

Aug. 2023 – May 2027

Emory Oxford College

Associate's in Liberal Arts, GPA: 4.0

Oxford, GA

Aug. 2023 – Dec. 2024

LEADERSHIP

Emory Hacks | Senior Hackathon Director

May 2025 – Present

- Co-Found and Direct the primary computer science-centered hackathon at Emory University, leading a cross-functional team of 20+ members in marketing, operations, and technology
- Develop a comprehensive, systematic roadmap for fundraising, social media marketing, and outreach with industry leaders in technology and business
- Increase hackathon funding by 30% by securing \$10k from various sponsors
- Improve hackathon participant engagement by increasing registration rate and projected attendance by 200%
- Organize day-of operations across 36 hours to curate a smooth and effective hackathon by managing volunteers and communicating with participants, judges, speakers, mentors, and advisors

Crochet@Emory | Treasurer

Jan. 2025 – Present

- Manage club funds, keep extensive account records, optimize club expenditures to adhere to budgets, and effectively increase club's funding during monthly cycles
- Allocate spending for higher quality resources for local community and volunteer fiber arts workshops

Phoenix Literary Arts Magazine | President

Aug. 2024 – Dec. 2024

- Produced second print of the only literary arts magazine at Oxford College by managing three committees with 10+ members in editing and designing magazines
- Effectively fostered local creative community with over 60+ submissions and platforming small artists and writers

EXPERIENCE

Emory Embodied Interaction Lab

Aug. 2025 – Present

Human-Computer Interaction Research Assistant

Atlanta, GA

- Conduct research under Dr. Kristin Williams on sustainable textile production through the study of craft and HCI
- Undergo rigorous product design to create functioning prototypes with various physical computing skills such as using physical hardware, laser cutting, and CAD

National Science Foundation

May 2025 – July 2025

Research Experiences for Undergraduates (REU) Research Assistant

Starkville, MS

- Selected for a 10-week REU program (5% acceptance rate nationwide) under the mentorship of Dr. Jingdao Chen
- Conducted rigorous research on segmentation models and vision-language navigation (VLN) for developing real-time, instance-aware Vision Language Maps
- Evaluated Segment Anything Model (SAM), Grounded SAM, and the You Only Look Once (YOLO) models for speed, accuracy, and cybersecurity performance on the ConSLAM dataset and hand-compiled datasets using the GHOST Vision 60 Robot
- Improve research efficiency and rigor by 75% by collaborating closely with team members and exercising interpersonal and cross-disciplinary communication skills
- Presented findings via poster and oral explanation at the MSU Summer Research Symposium, featuring 150+ presentations and 300+ attendees

TECHNICAL SKILLS

Relevant Coursework: Data Visualization, Computational Linguistics, Machine Learning, Database Systems, Physical Computing, Data Structures and Algorithms, Analysis of Algorithms

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, HTML/CSS

Tools: Github, Autodesk Fusion, Google Cloud Platform (GCP), VS Code, Figma, Microsoft Office (Word, Powerpoint, Excel, Outlook), Google Suite (Docs, Spreadsheets, Slides, Gmail), Eclipse

Libraries & Frameworks: D3, Reactjs, pandas, NumPy, Matplotlib, OpenCV, pyTorch

Hobbies: Graphic Design, Sewing/Garment-Making, Fiber Arts, Electric Bass Guitar
